

**NEWS RELEASE:
FOR IMMEDIATE PUBLICATION**

15 May 2019

SSP teams up with partners, AWS and Mphasis at this year's BIBA event

Today marks the first day of the BIBA conference and this year SSP is being supported by cloud partner, Amazon Web Services and next-gen technology partner, Mphasis.

During this two day event, brokers will have the opportunity to listen to 'ted-talk style sessions' from the SSP Partners. Senior Solutions Architect, Greg Share from AWS will uncover the core capabilities of their industry-leading cloud technology. He will talk about the differences between SSP Cloud running across 9 data-centres simultaneously and what has previously been offered to the market from single datacentres.

Vijay Mahendrakar, SVP Insurance Solutions from Mphasis, will present their talk on day two, highlighting how brokers can embrace digital innovation by becoming more customer centric. Mphasis is at the forefront of innovation and next-gen technologies and has supported SSP with the build of its new solution, SSP Broking.

Jim Sadler, Chief Operating Officer said: "We are proud to be welcoming our expert partners for the first time at BIBA and honoured to have their technical support on the build and implementation of our most advanced broking software offering in the market today."

The SSP team will also be available to demonstrate the digital capabilities of the new solution, SSP Broking and BIBA 2019 also marks the 25th anniversary of Keychoice, SSP's distribution group. Keychoice has come a long way since 1994. Today having over 25 insurer and business partners and with a membership base of almost 500 brokers, controlling in excess of £1.56bn GWP.

Notes to editors

About AWS

Amazon Web Services (AWS) provide IT infrastructure, trusted by over 1 million customers worldwide. In 2006, Amazon Web Services (AWS) began offering IT infrastructure services to businesses in the form of web services -- now commonly known as cloud computing. One of the key benefits of cloud computing is the opportunity to replace up-front capital infrastructure expenses with low variable costs that scale with your business. With the Cloud, businesses no longer need to plan for and procure servers and other IT infrastructure weeks or months in advance. Instead, they can instantly spin up hundreds or thousands of servers in minutes and deliver results faster. Today, Amazon Web Services provides a highly reliable, scalable, low-cost infrastructure platform in the cloud that powers hundreds of thousands of businesses in 190 countries around the world.

About Mphasis

Mphasis (BSE: 526299; NSE: MPHASIS) applies next-generation technology to help enterprises transform businesses globally. Customer centricity is foundational to Mphasis and is reflected in the Mphasis' Front2Back™ Transformation approach. Front2Back™ uses the exponential power of cloud and cognitive to provide hyper-personalized (C = X2C2TM = 1) digital experience to clients and their end customers. Mphasis' Service Transformation approach helps 'shrink the core' through the application of digital technologies across legacy environments within an enterprise, enabling businesses to stay ahead in a changing world. Mphasis' core reference architectures and tools, speed and innovation with domain expertise and specialization are key to building strong relationships with marquee clients.
